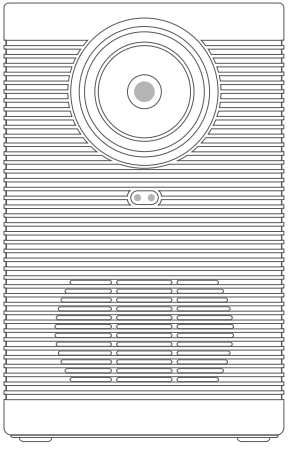
Music Projector



User Manual

Introduction

We are committed to continuously improving and enhancing product performance. The images and functional descriptions provided in this manual are based on the actual product and factory settings. We reserve the right to make improvements to the product's features and user interface without prior notice. Please refer to the actual product for final confirmation.

Please ensure that you take proper care of your device. We are not responsible for any losses incurred due to software or hardware misuse, repairs, or any other reasons. We also disclaim any liability for losses resulting from the disclosure of personal information to third parties. Additionally, we are not liable for any third-party claims arising from the use of this product.

This manual has undergone careful review and proofreading by our staff. If there are still any omissions, we apologize for any inconvenience and welcome your corrections.

Safety Precautions

1. When using the product, ensure that the air vents are not blocked or obstructed. This will prevent the projector from overheating and potentially getting damaged.

2. Avoid dropping or impacting the product from heights to prevent damage to internal electronic components.

3. Do not look directly into the optical lens to avoid potential eye injury from strong light.

4. Use a clean air blower to remove dust from the surface of the lens.

5. Do not use chemicals, cleaning agents, or water to clean the equipment to prevent damage to the circuit boards due to corrosion.

6. Do not store the device in excessively hot or cold environments. The recommended storage and operating temperature range is typically 0°C to 40°C.

7. Avoid throwing, hitting, or subjecting the product to strong vibrations to prevent damage to the internal circuit boards.

8. Do not attempt to disassemble the device on your own. If you encounter any issues, please contact authorized professional personnel for assistance. Do not attempt self-repair.

9. Use the official provided adapter to charge the device.

Warning: (1) Our brand will not be held liable for any personal injury, property damage, or other losses resulting from failure to follow the instructions or safety precautions provided in the product manual. (2) Operating this device in residential environments may cause wireless interference.

The device is designed for use in non-tropical climate conditions, with a maximum expected operating temperature of 25°C.

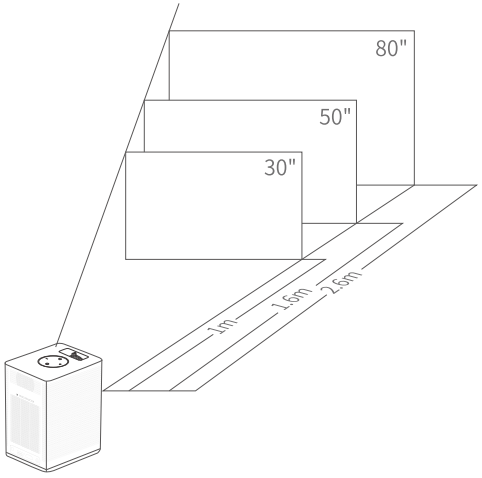
C1 Pro Remote Control

3 Projection Distance and Size

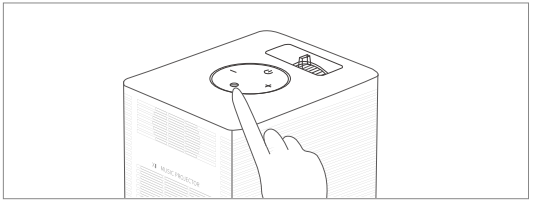


• The distance between the projector lens and the screen, the zoom ratio settings, and the video format all affect the size of the projected image.

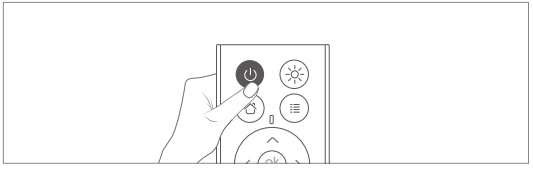
• The projected area is directly proportional to the projection distance: the farther the projection distance, the larger the projected area, but the corresponding image clarity may decrease. Users can choose the appropriate projection distance based on their actual usage conditions.

The distance between product and surface	1m	1.6m	2.6m
Projected size	30"	50"	80"

4 Power On/Off



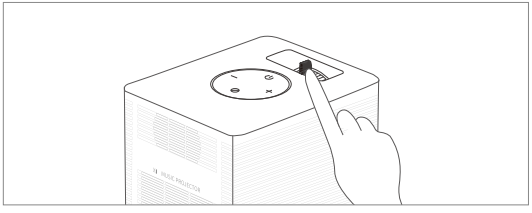
Power On: Press and hold the device's power button for approximately 3 seconds to turn it on.



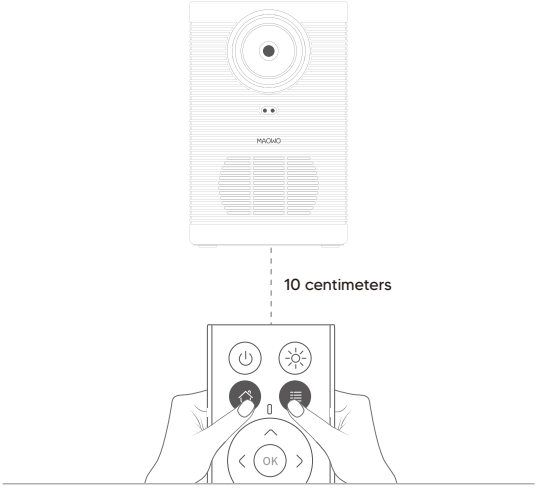
Power Off: (1) Press and hold the power button on the remote control or projector to access the options menu, then select "Power Off." (2) Press and hold the power button on the projector until it forcibly shuts down.

5 Focus Adjustment

Turn the top knob on the camera body to focus.



6 Remote Control Pairing



Bring the remote control close to the projector, at a distance of approximately 10 centimeters. Simultaneously press the Home button and Menu button on the remote control. The indicator light on the remote control will start flashing, indicating that it has entered pairing mode. Once the indicator light starts flashing, you can release the buttons, but the indicator light will continue to flash. Wait for the projector to emit a "beep" sound, indicating a successful connection. If the pairing is not successful within 30 seconds, it will exit. In such cases, repeat the above steps to try again.

7 Remote Control Function Explanation

① Power Button: Press and hold the power button on the remote control for 3 seconds to shut down.
